- *Analytics:* Statistical/Predictive Modeling, Forecasting, Exploratory Data Analytics, Sales & Operational Analytics
- *Engineering:* Data Processing & Visualization, ETL Workflows, IDP Automation, Workspace Migration
- *Interests:* Market Strategy, Project Management, Data-driven Risk Analysis, Cross-functional Collaboration, Vertical Strategy

PROFESSIONAL EXPERIENCE

Graduate Assistant, William & Mary, Virginia, USA February 2026 - Present

- Statistics & financial management teaching assistant for UG business students across 7 courses, supporting 3 professors.
- Automating print shop communications & marketing workflows, migrating tools from Google to the Microsoft ecosystem, boosting process efficiency, and aligning with university IT guidelines.

Product Marketing and Management, INSILLION, Chennai, India January 2023 - July 2025

- Built predictive fit/gap models assessing market risk, competition & adoption trends for global expansion strategy.
- Rebuilt pre-sales database & CRM workflows, increasing integrity & cutting retrieval time from ~10 days to <2 minutes.
- Aligned cross-functional teams & authored 5 BRDs, translating complex objectives into strategic executive insights.
- Directed 1st USA product launch, coordinating timelines, resources & approvals to ensure on-schedule rollout.
- Integrated LLM APIs & built client-facing embedded web components for automated IDP and quote analysis.

Research Analyst, Anheuser-Busch InBev, Bangalore, India May 2021 - January 2022

- Identified internal workflow inefficiencies in the Beer-Garage division & delivered data-driven, actionable improvements.
- Crafted 3-year, research-driven strategic plans to guide long-term business priorities and capitalize on market trends.
- Drove full-cycle international pilot initiatives, delivering 3 successful rollouts across Sub-Saharan Africa & Europe.

RELEVANT PROJECTS

- **Patient Retention & Churn Modeling:** Developed predictive models to identify high-risk patient churn by analyzing behavioral, demographic, and clinical data, informing targeted retention strategies.
- **Allegiant Air's Demand & Revenue Forecasting:** Conducted time-series analysis of flight occupancy and ancillary revenue to forecast demand and recommend regional market expansion opportunities.
- **Virginia Drug Overdose Data Warehouse & Dashboard:** Built a centralized SQL data warehouse and interactive Tableau dashboard to monitor statewide drug trends, integrating socioeconomic indicators to guide proactive interventions.
- **Employment & Economic Trends Dashboard:** Designed an interactive dashboard using Plotly and Dash to track headcount, wage growth, and industry trends across North America, enabling data-driven workforce and market insights.
- **Go-to-Market Strategy, Insillion U.S.:** End-to-end GTM strategy with customer acquisition planning, market research, and partnership development for USA expansion.

HONORS & CERTIFICATIONS

- **100% Salary Appraisal:** 1st INSILLION employee in 24 years to earn full appraisal for leading USA's GTM strategy.
- **Executive Presentation & Technical Excellence:** Selected to present Python Dash analytics project to the MSBA Board, translating complex data architectures into actionable executive insights.
- **Google:** *Foundations of Data Science.*
- **UPenn:** *Financial Accounting, Operations Management, Corporate Finance, Marketing (Coursera)*
- **DataCamp:** *Data Analyst Associate*
